PROFILE

MCA student specializing in Big Data with hands-on experience in Python, SQL, Machine Learning, Data Analytics, and AI-driven solutions. Skilled in data preprocessing, exploratory data analysis, predictive modeling, and data visualization using Python, Pandas, NumPy, Scikit-learn, Power BI, and Tableau. Passionate about building intelligent systems and applying AI/ML techniques to solve real-world business problems

SKILLS

- **Programming:** Python, SQL, C, JavaScript
- **Frontend:** HTML, CSS, React (Basic)
- **Backend:** Django, Django REST Framework
- **Databases:** MySQL
- **Data Science & ML:** NumPy, Pandas, Scikit-learn, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Machine Learning Models
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Postman
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration, Continuous Learning

PROJECTS

MedLens – Medical Analysis Application
Academic Project | Jul 2024 – Feb 2025

- MedLens is an AI-powered healthcare application developed to analyze medical data, predict diseases, and provide personalized health recommendations.
- It uses healthcare datasets for data preprocessing, feature engineering, exploratory data analysis (EDA), and machine learning-based disease prediction.
- It provides risk assessment, health monitoring, and AI-driven dietary recommendations through an integrated Flutter application.
- The project includes model development, evaluation, data visualization, and a multi-module healthcare management system for patients, doctors, laboratories, and administrators.

SmartCrop – Crop Recommendation System
Machine Learning Project

- SmartCrop AI is a crop recommendation system built using Streamlit and a Random Forest model to predict the best crop based on soil nutrients and climate conditions.
- It uses inputs like N, P, K, temperature, humidity, pH, and rainfall to generate predictions with confidence scores and top suggestions.
- The project includes model training, a Streamlit interface, and a dataset for building an efficient and accurate prediction system.

EDUCATION

Master of Computer Applications (MCA) – Pursuing — 2025 – Present
LEAD College of Management (Autonomous), Palakkad

Bachelor of Computer Applications (BCA) — 2022 – 2025
Malabar College of Advanced Studies, Vengara, Malappuram

CERTIFICATIONS

GenAI Powered Data Analytics Job Simulation – Tata (Forage) — Jan 2026
Android App Development using Flutter – NASSCOM Certified (36 hrs) — 12 Jan – 16 Jan 2026
Web Development using React JS – NASSCOM Certified (36 hrs) — 31 Jan – 04 Feb 2026
